

### *A Great Choice for Pain Management*

Z TEK™ is an electrical nerve stimulator that works to manage pain through high-frequency settings and stimulates the muscles to contract and relax through low-frequency settings. The technology is very effective at reducing swelling, and the complications of post-surgical scar tissue.

*Patients that use Z TEK™ avoid the risk of possible adverse effects of various drug therapies, and avoid the uncomfortable and sometimes debilitating, over-medicated effect.*

### *For Prescription and Clinical Use*

Federal law restricts the sale of this device on the order of a licensed physician or doctor, under the laws of the state where licensed to practice.

- Portable for Clinical and Home Use

ASK YOUR DOCTOR ABOUT

## About Z Technologies

Z-Technologies LLC is a Georgia-based company that manufactures and markets electrical nerve stimulators to the healthcare and sports medicine industries. Z TEK™ can allow you to effectively reduce chronic and acute pain in your management of one of the most critical aspects of patient healthcare—without invasive surgeries, without addictive drugs, and open-ended physical therapy.

*Z Technologies is committed to exploring and bringing you new technologies to help you manage your pain.*

Z TEK™ is intended for use by clinicians in the symptomatic relief of chronic intractable pain. Also, for post traumatic and post surgical pain relief. Z TEK is a cost effective therapy for patients who attempt to return to work and continue activities of daily living.

## ZTEK™ Model F4

### SINGLE CHANNEL NERVE STIMULATOR

#### Features:

- Portable for clinical or home use
- Single channel for smaller areas
